

ASUS Eee PC T91

Sunday, 07 June 2009

The Windows 7 platform certainly is paving the way for the next generation operating systems. Of course, the ASUS Eee PC T91 has made plans to adopt the Windows 7 anytime soon, when the operating officially launch this year.

Nevertheless, one of the most ideal features of the Windows 7 is the multiple touchscreen capabilities, whereby you can in fact control multiple cursors or pointers simultaneously, just like what you see on the iPhone platform.

On the other hand, the ASUS Eee PC T91 comes with the following hardware:

8.9-inch LED-backlit touch panel

3G-equipped and GPS module

Bluetooth

WiFi

Atom Z520 CPU

multicard reader

Ethernet

VGA output

2 USB 2.0 sockets

Take a look at a snapshot of the ASUS Eee PC T91:
