
USB Type-C Smartphone Le Max by LeTV

Tuesday, 14 April 2015

Well, every smartphone maker is trying to top the notch further with the bid to capture more smartphone market share with their extraordinary hardware specifications. And the latest smartphone maker to include a spanking new Type-C USB is none other than the Le Max smartphone, which was created by LeTV, a Chinese smartphone company.

Generally, Le Max is an all-aluminum smartphone, and it comes with top of the line specs too, namely, 6.33-inch Quad HD display, a Snapdragon 810 chip (2GHz, octa-core, 64-bit), 4GB of LPDDR4 RAM, a whopping 64GB or 128GB of internal storage. It also has a 21-megapixel f/2.0 camera (with Sony's new IMX230 sensor, plus optical stabilization and dual-tone flash) and a bright UltraPixel selfie imager. And not stopping just yet, Le Max is equipped with an ESS Hi-Fi chip (with AKG's audio tuning), a one-touch fingerprint reader, infrared remote, a 3,500 mAh battery, dual LTE SIM support and WirelessHD display link. This smartphone would definitely upset other mainstream smartphone manufacturers, don't you think?
