

Microphone Box

Wednesday, 27 May 2015

My rock band s lead singer is really talented, whereby his voice is really beautiful, and he can reach high pitches with ease, and he is one of the best vocalists that I have ever met in my life. Generally, a good vocalist must be paired with a good microphone, as a high quality microphone can enhance their performances. My lead singer has recently told me that he owns a large microphone collection, and sometimes he carries his microphones around inside a microphone box. According to him, his microphone box can fit 6 microphones, and the box has high quality sponges that would encase the microphone in, which helps absorb unnecessary impacts that would otherwise damage the microphone.
