## Affiliate Marketers: The Tricky On

Wednesday, 05 December 2007

I believe everyone will do their best when it comes to making money - by crook or by hook, once you get the amount that would grant you early retirement, NOBODY would question you on how you get your money, whether was it legal or through illegal means. Being rich promotes your status in the society and you are no longer the average Joe that people used to look at you previously.

Alas, there are several consequences when it comes to getting rich the illegal way - you'll gather loads of bad karma. If you are a person who is strong enough to ward off these bad energy surrounding you, you will be on the path of success. Else, it'll be a life full of misery.

Bottom line is - it's time to be RICH!
